## WORK EXPERIENCE

### • Front-End Developer

PPL

10/22-present

Key Responsibilities:

- Web Development: Develop and maintain front-end code for websites and web applications, using HTML, CSS, Tailwind, JavaScript, jQuery, React, RESTful APIs and Webpack.
- Responsive Design: Create responsive web designs that adapt to various screen sizes and devices, ensuring a consistent user experience across platforms.
- User Interface (UI) Implementation: Translate UI/UX designs into code, focusing on pixel-perfect implementation and intuitive user interfaces.
- Performance Optimization: Optimize front-end code and assets (images, scripts, etc.) for faster page loading and improved website performance.
- Accessibility: Implement web accessibility standards (WCAG) to ensure that web content is usable by people with disabilities.
- Version Control: Use version control systems (Sourcetree & Bitbucket) to manage code repositories and collaborate with other team members.
- Collaboration: Collaborate closely with back-end developers, designers, and other team members to ensure seamless integration of front-end and back-end components.
- Stay Current: Keep up-to-date with industry trends, best practices, and emerging technologies in front-end development.

### • Web/Email Designer

AZONETWORK

09/21-09/22

- Creating customized emails and newsletters using HTML, CSS, JavaScript, jQuery, DreamWeaver, Photoshop and Salesforce.
